

# Final Poster Session

This document contains instructions for creating your poster, logistics for the day of the poster session and instructions for the peer review assignment due on Gradescope.

[Poster Presentation Day Logistics](#)

[Peer Review Assignment](#)

## Poster Creation

**Template:** While not required, you may use any of [these templates](#) to create your poster. The template is in the form of a powerpoint slide, where you can zoom in on particular sections as you work on them. You can change the quantity and length of the sections in the template. Additionally, please include your group number in the top right corner of your poster. For inspiration, see example posters available [here](#).

**Printing:** Please see [these instructions](#) for printing your poster on campus (typically in [REDACTED]). Note that you should allow for up to 24 hours of processing time. Please print your poster with dimensions no greater than 30"x40".

## Poster Presentation Day Logistics

**Date/Time** The poster session will be held on Friday, December 6 from 9:30-11:30am in the [REDACTED]. **All students are required to attend for the full 2 hours.**

**Setup** We will set up the [REDACTED] in advance with easels, boards, and pins. Please choose any available easel and use the pins to hang up your poster.

**Details** The format of the poster session is similar to a science fair. Each group will stand near their printed poster, and other students will walk around and stop by your poster to hear about your work. Therefore, it will be helpful if you prepared a brief 2-3 minute pitch to explain your project and poster, and you should be prepared to answer any follow-up questions the audience may have. The poster presentation component of your grade will be determined based on:

- The clarity, depth, correctness, readability, and overall quality of your poster
- The clarity, depth, correctness, and overall quality of the poster presentation given to the instructors when they stop by your poster

**Peer Review Procedure** During the poster session, each group member will be responsible for (1) presenting their poster and (2) reviewing the posters of other groups. To do this, please divide your group into **two roughly equal subgroups**. During the first hour of the poster session, the first subgroup will present their group's poster while the second subgroup walks around to view other posters and complete the peer review assignment discussed below. During the second hour of the poster session, these roles will switch.

## Peer Review Assignment

You are required to provide reviews for posters from two groups: the group whose number is one below yours, and the group whose number is one above yours (with groups 1 and 17 reviewing each other's posters). Please see the corresponding gradescope assignment for the particulars of the questions. See above for additional logistics on when to visit the posters. This peer review assignment should be completed *individually*, and it is due by noon on the day of the poster session (so it might be helpful for you to bring your laptop along; if that poses a problem please email [REDACTED] as soon as possible).
